Superman and me sherman alexie analy

Superman and me sherman alexie analysis. Superman and me sherman alexie rhetorical analysis.

Is the world a collection of paragraphs? Reading a literary piece is simple, but analyzing the true meaning behind the text is imperative to acquire the full understanding of the story. In the piece "The Joy of Reading and writing: Superman and me", by Sherman Alexie, portrays the meaning through his experiences, from the beginning as an ill-fated Indian to become an intelligent one through diligence and eagerness to become successful. By describing how he taught himself how to read at the age of three, the author narrates his own story to illustrate the faint chances that he had as a young Indian in a reservation to succeed in life based on the circumstances in the society around him. This was not only limited by poverty, but also the limited school system that was around him which indirectly dispirited Indians who were aspiring to become successful. To overcome this life this Alexie shows how it is tremendously significant to pursue your goals through self-motivation. With the reading and writing shaping his life into what it is today, it can be seen that there are no boundaries to any person as long as they have ambition. Alexie's discussions of the complications that he had to overcome reflect the importance of self-motivation in this astonishing piece. By making an implicit argument, the implications are indirectly alleged through the piece. It is effervescent the author argues that any person has the potential to become successful, but all they need is an initial start that leads to dedication. For instance: When "Superman is breaking down the door" (17), it is as though the author himself is "breaking" through his barrier that he is living in and will try to come out of it into the tangible world to become efficacious. This is a usage of imagery, where the author relates himself to Superman subtly. "I refused to fail. I was smart. I was arrogant. I was lucky." (17) Regardless of the author's status, he was willing to let his self-motivation aid him to becoming successful. He starts to teach himself how to read and supplements his knowledge to approach his goals with each word. The author explains, "At the same time I was seeing the world in paragraphs..." (16) this quote shows how the world started to come together as a story just like paragraphs make up the entire story in a literary piece. Any subject Min. 3-hour delivery Pay if satisfied Get your price The author exemplifies the importance of the story by using the language through imagery, writing style, and occasionally direct statements in the text . He augments the understanding of the story by utilizing first person to give the reader a meticulous point of view about his life. This is rendered through the real story of the author's life, giving inspiration to the readers. Not only does the author use his astuteness to be successful, but also shares it with the younger generation around him. In order to share his experiences; he visits a local school to share what he has faced during his life. When Alexie articulates, "I cannot recall a single time that a guest teacher visited the reservation" (18) it means that you are not considered a full genius if you cannot share your experiences with the rest of the people around you. By sharing his intelligence with the age group where he started off, he sustained the potential to change the lives of the children in the school. At extremities , the author even manages to go overboard to basically force the students to focus on education, this is done out of his importance for the children. Alexie yells at them "Books, I say to them, Books! ... I am smart. I am arrogant. I am lucky. I am trying to save your lives." (18) At times, Alexie even compares himself to the other students at school, to show how he was above them but he was not expected to be because he was native Indian. "We were Indian children who were expected to be stupid." (17) He was not "meant" to be successful according to the people around him in the society, but Alexie manages to overlook these negative racist statements and decides to go his own way to get ahead of them. To show his zeal to surpass the racism he says, "A little Indian boy teaches himself to read at an early age and advances quickly." (17) This shows how Alexie excelled the standards set by society and proved to show that any person can be successful no matter what race, ethnicity, or class they are. In contrast to the society's visualization, Alexie succeeded and states his success in life to inspire other Indians to undertake the challenges . Alexie what he read in books with others around him, and thus effectively makes his argument to the reader impeccably. One of the ways that the author exploits this is by using a specific type of language and first person point of view. He talks about how he had basically taught himself to read. For instance: Sherman repeats the usage of every material he could possibly read, anything that contained anything from a couple of words to entire books. "I read the books my father brought home from the pawnshops and secondhand. I read the books I borrowed from the library. I read the backs of cereal boxes. I read the newspaper, etc..." (18) By emphasizing this practice, the author shows how this not only lead him to successfully being able to read, but he also became a writer in the end. Reading was the source where Alexie acquired his own "super powers", like in the Superman comics, which fueled his excursion out of the reservation. "I didn't have the vocabulary to say "paragraph," but I realized that a paragraph was a fence that held words." (16) It is seen in this quote that it is an indirect reference to the author's life of how he did not have enough materialistic things in life, but he knew what he had to learn to become successful in his life. Sherman Alexie displays the impediments that he had to over come to become affluent in society. This begins when Superman breaks down the door in the story that Alexie reads, and ends with him visiting the schools often as possible to share his aptitude. Barriers are not only physical, like the door that he broke down metaphorically, but also barriers mentally that he overcame. Becoming an astonishing phenomenon to others, the author shares his experiences for the well being of others. Alexie was a hero who not only defeated his "enemy", but also saved his own life and others at the same time. The standards of society did not impinge Alexie, and he managed to overlook them to become successful through self-motivation. The meaning of the story is clearer than a glass door, but people have to first take that initial step to open the door of opportunities to be successful. To Alexie, the world was a collection of paragraphs coming together to become a successful story. The purpose of this essay was to read a short story then write an analytical summary about it. We were then asked to choose writing tools that the author used in his short story and analyze them. We were provided two short stories from which we could choose to write about for this assignment. The two articles were "Mother Tongue" written by Amy Tan and "Superman and Me" by Sherman Alexie. In the short story "Superman and Me", the author, Sherman Alexie, details how he learned to read despite having very limited resources on the Native American reservation where he grew up. Alexie starts his story by introducing how he learned how to read using a "Superman" comic book. Alexie learned to read by looking at the pictures and assuming what the dialogue boxes would say based on those illustrations. Alexie mentions that he does not remember the plot of the "Superman" comic book he used. This is crucial because it stresses the fact that he used a comic book to read because unlike Alexie did not have the vast educational resources that the privileged white children had. He had to use whatever he could find in order to obtain an education. This is also expressed when he tells the reader about how he would read his father's odd collection of novels. Alexie read whatever he could find, he didn't care what it was about, as long as he was reading he was pleased. Alexie details the fact that growing up on a Native American reservation meant that you were destined to fail. Knowing this stereotype motivated Alexie to become an exception to this rule. He knew that a key to success was reading and an education. Later in the story, after becoming a successful writer, Alexie went to a Native American reservation to speak to a class about reading and writing. He stressed the fact that an education was crucial to being successful, but his pleas fall upon deaf ears. Although the students do not listen to him, he knows that he cannot give up and that he must continue to attempt to break through to these students. Alexie's use of personal anecdotes fortifies the impact he has on his audience. Alexie's personal anecdotes create a connection with his audience that allows him to further captivate them. One anecdote that Alexie includes is about how he learned to read from a comic book. This anecdote evokes sympathy and amazement from the reader. These emotions are inspired by the anecdote because he becomes successful despite his depressing situation. He does not have any of the educational resources that white children have when they are learning to read, but he uses his minimal resources and becomes a successful writer. His depressing situation causes people to feel sympathy for him. The irony in the fact that he used a comic book to learn how to read and then he became a successful writer amazes the reader and the reader develops a deeper respect for him. Alexie's effective use of anecdotes inspires me to use them in my own writing. I would use them to supplement my writing in the same way that Alexie does; I would use them if I wanted to connect with my reader and evoke certain emotions from them. Anecdotes are a very simple, efficient way to elicit a variety of emotions from your audience. Throughout Alexie's short story he uses repetition in order to introduce a point and then reference back to it later in the article. The phrase that Alexie repeats is, "I was smart. I was arrogant. I was lucky. I was trying to save my life." Alexie first introduces this point when he is talking about how he was growing up on the reservation and wanted to succeed in life and was trying to escape the depressing life on the Native American reservation. Later in the story he goes to a Native American reservation and attempts to make a breakthrough with the students. At this point he repeats the same phrase, however, he changes it to, "I am smart. I am arrogant. I am lucky. I am trying to save our lives." He changes the tense used in his phrase and changes 'my life' to 'our lives' because he is now talking about how he wishes to change not only his life, but the lives of the Native American children he meets. Alexie's use of repetition effectively shows the recurring theme of his desire for success. Alexie introduces and reintroduces this phrase at very two critical moments in the story. I think that he placed the phrase correctly at two points in the story because both points in the story discuss the same central idea of succeeding and Alexie's motivation for success. The difference, however, is that at the first point in the story Alexie is talking about success in his own life. At the second point in the story Alexie is talking about success in the lives of the Native American children. I would use repetition in my writing. I would only use it, however, if there was a recurring theme that needed to be connected throughout the story. As a reader, this repetition clearly shows the connection between the two points in the story. Alexie's repetition also evokes emotion from the reader. The reader becomes immediately interested in Alexie's life and they see to see him succeed. When Alexie uses the same phrase that he used to relate to his life to talk about the Native American children the reader feels that same desire for them to succeed that they felt for Alexie. In "Superman and Me", Sherman Alexie uses personal anecdotes and repetition as two very strong writing tools. His use of each leaves a lasting impact on his audience. Both writing tools are very different in nature but, Alexie uses them to catch similar responses from his audience. Personal anecdotes and repetition can be used to evoke emotions from his audience. The fact that Alexie uses both writing tools to do this shows the impact he wanted to leave on his audience. He did not want this piece to just be informative, he wanted this piece to be emotional and he wanted his reader to catch a glimpse into the emotional whirlwind that is growing up on a Native American reservation. Page 2 Overall I had a lot of trouble with this essay. At first I could not understand what exactly I had to do to answer the prompt correctly. After solving this problem my next problem was the analytical summary. This was my biggest problem and the hardest to solve. At first my summary was extremely lacking and I didn't know how to fix it. After leaving it to settle for awhile I came back to my essay and I finally understood the concept of an analytical summary. When I figured this out I decided that I had to completely revamp my essay. I changed much of my summary and added a lot of pertinent information that I had left out. I also changed my body paragraphs. I added more analysis and more evidence. My conclusion was also edited. I tied the two writing tools, repetition and anecdotes, together. At the beginning I was very reluctant to edit my essay because I thought it was alright as it was. After I came back after not looking at it for a few weeks I realized how badly my essay needed editing. I feel like it is so much better now that I have edited it.
